Doctor in inorganic chemistry,
Institute of Inorganic Chemistry,
University of Cologne

Dr. Claudia Acquistapace

Junior research group Leader,
Institute for geophysics and meteorology,
University of Cologne

Dr. Hajar Maleki

Group leader at Institute of inorganic chemistry
and associated group leader at CMMC, DFG,
University of Cologne

WHO IS A GREAT SCIENTIST?

If you ask a child to draw a scientist, they will usually draw a white man. Is it true that scientists are only white men? Somehow yes, still. Data show that after PhD level, the number of men continuing in academia is becoming larger and larger than the number of women.

Why is it so? What are the main reasons behind this trend? The Wetoo documentary asks female scientists at different career stages what they think about this and how they live the situation from the inside. But women are not the only ones excluded. What about all groups not belonging to heterosexual white men?

We will discuss all this with you and our speakers in our get together on the **05 May 2023**, from 16:30 to 19:00.
